Point Paper Auction Surplus

Problem:

Public Works has identified electronic equipment that is outdated or no longer used along with vehicles that have reached their maximum usage (see attached list). Staff estimates that the vehicles and equipment have the potential to be sold for approximately \$10,000, if these items are not sold at this time they will continue to deteriorate which diminishes the estimated revenue from the sale of these items.

Background:

In an effort to maintain a safe and cost effective operating fleet, Public Works staff monitors the Operation & Maintenance Program for all vehicles. This procedure includes provisions which allow the DPW to determine when a vehicle has reached its potential maximum usage. When this determination is made, the DPW assembles a list of these surplus items to be sold at a public auction.

Staff monitors electronic equipment (computers, keyboards, etc.) that have become outdated or have reached potential maximum usage.

Alternatives:

- 1.- Take No Action.
- 2.-Enter into a contract with Holzman Auctioneers to conduct the auction.

Recommendation:

Staff recommends entering a contract with Holzman Auctioneers to conduct the auction.

Budget Impact:

There will be no actual impact to the City's budget. Based on the gross auction receipts, the City will pay a tiered percentage, as stated in the agreement. The City will also be responsible for the cost of the advertising that will be done by the auctioneer. These combined expenses will be taken from the gross receipts by the auctioneer and the net will be paid to the City.

Point Paper

Background:

In an effort to maintain a safe and cost effective operating fleet, the Palmetto Police Department (PPD) staff monitors the operation and maintenance program for all assigned vehicles. This procedure includes provisions, which allow the department to determine when a vehicle has reached its maximum usage. When this determination is made, the department assembles a list and request thru Department of Public Works that these vehicles be sold at a public auction or scraped.

Problem:

The department has identified four vehicles (see-attached list) that have reached their potential maximum usage. Staff believes the listed vehicles have no value. These vehicles have been cannibalized for parts and should be scraped. These vehicles are currently being stored at Bill Lees Automotive.

1. The vehicles are not serviceable and most usable parts have been removed.
2. Bill Lee's no longer wants the vehicles stored there.

Alternatives:

1. Have the vehicles moved to Public Works at a cost to the city.
2. Attempt to sale the vehicles at public auction.
3. Allow Bill Lee's to take the vehicles to the scrape yard at no cost to the city.

Recommendation:

Staff recommends that the City of Palmetto permit Bill Lee to dispose of the vehicles at no cost to the City.

Holzman Auctioneers AB 1473

Start to finish, our typical auction is handled with an initial visit a few weeks to a month in advance for preliminary evaluation and photography, followed by 3 to 5 days of preparation the week before the auction date. However, if your need is more immediate, we can have your office(s) and/or warehouse(s) empty in as little as 2 weeks from the initial contact.

Mike Holzman AU 2013
