## Examples of Cooperative Improvement Projects

The following projects involved construction, funding or installation of improvements by a local government entity partnering with the School Board for the benefit of both:

- Park at Ballard Elementary School (2002): The School District allowed the City of Bradenton to utilize land for a small park adjacent to Ballard Elementary. The City of Bradenton provided about \$30,000 worth of equipment. The park is open to all and also serves as the play field for Ballard Elementary School.
- Lakewood Ranch Park (1998): The multi-sport athletic complex adjacent to and north of Lakewood Ranch High School was built by the School District on School District (the football stadium) and Manatee County (baseball fields, softball fields, tennis courts, basketball courts, handball courts, etc.) property. Manatee County reimbursed the School District for a majority of the improvements on Manatee County property. The facilities are used by all. In addition, Manatee County paid for the northerly access road and parking area which benefit both properties.
- Nolan Middle School Tennis Court Lighting (2004): At Manatee County's request and expense, the School District installed lighting for the Nolan Middle School tennis courts. These courts are open to all.
- Braden River High School Perimeter Road Improvements (2006): Various traffic improvements adjacent to and in the vicinity of Braden River High School were constructed by the School District. The School District paid \$1.2 million towards the improvements and Manatee County paid the balance of \$2.5 million.
- Sidewalk Improvements in the vicinity of District schools (various dates):
- School Zone Signage (2007): Due to new closing times for schools, all school crossing signage needed to be modified prior to the opening of schools in August. The School District and Manatee County shared the expense.
- School Zone Flashing Lights (2008): Manatee County has committed to installing flashing School Zone lights where needed throughout the county. This year, eight priority installations were completed. The School District and Manatee County shared the expense.
