TAB 2
Figure 6-1: Soil Arsenic Concentrations at the Surface

- Soil Arsenic Greater Than Residential SCTL
- Former Edenfield Property
- Monitoring Wells (MW)
- Soil Borings (SB)
- Soil Arsenic Greater Than Commercial SCTL
- PAH Results Exceed Residential SCTLs
- 1:1 = Soil Arsenic Concentrations in mg/kg
- 1 inch = 30 feet

Legend:
- Orange: Soil Arsenic Greater Than Residential SCTL
- Green: Monitoring Wells (MW)
- Yellow: Soil Borings (SB)
- Grey: Soil Arsenic Greater Than Commercial SCTL
- Red: PAH Results Exceed Residential SCTLs
- Black: PAH Results Exceed Commercial SCTLs
Figure 6-2: Soil Arsenic Concentrations at 2-ft Depth

- Soil Arsenic Greater Than Residential SCTL
- Soil Arsenic Greater Than Commercial SCTL
- Former Edenfield Property
- Monitoring Wells (MW)
- Soil Borings (SB)
- PAH Results Exceed Residential SCTLs

6.9 = Soil Arsenic Concentrations in mg/kg
NS = Not Sampled

* = Boundaries consider arsenic data from 2004 unless such data are superseded by 2010 results
Figure 6-3: Soil Arsenic Concentrations at 4-ft Depth

- **Soil Arsenic Greater Than Residential SCTL**
- **Former Edenfield Property**
- **Soil Arsenic Greater Than Commercial SCTL**

- Monitoring Wells (MW)
- Soil Borings (SB)

3.0 = Soil Arsenic Concentrations in mg/kg
NS = Not Sampled

No PAH concentrations greater than FDEP criteria at 4-ft depth

* = Boundaries consider arsenic data from 2004 unless such data are superseded by 2019 results
